

Soltex Pile DeBond Foam

Description:

Soltex Pile DeBond Foam has been developed to facilitate pile cut off in the construction industry and to comply with Health & Safety legislation.

Soltex DeBond Foam is a high quality LDPE closed cell foam, of used as a debonding foam on reinforcing steel piles. The purpose of the debonding foam is to minimise vibration during fabrication and protect against corrosion.

Key Features

- Ideal for pile reinforcement and protection
- Anti-vibration properties
- Standard 2 metre lengths
- Easy application
- Available in larger sizes if required
- Closed cell LDPE Foam means no moisture absorbed

Soltex Pile DeBond Foam is a high quality CFC and HCFC free silver grey flexible closed cell polyethylene pipe insulation. The Foam is very flexible and easy to install. It is not fibrous and creates no dust during installation or use.
