Section 4: First aid measures

4.1. Description of first aid measures

Skin contact: Remove all contaminated clothes and footwear immediately unless stuck to skin. Wash immediately with plenty of soap and water.

Eye contact: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the lower and upper eyelids. Check and remove any contact lenses

Ingestion: Wash out mouth with water. If swallowed, do not induce vomiting- seek medical advice. Risk of product entering the lungs on vomiting after ingestion; in this case the casualty should be sent immediately to hospital.

Inhalation: If spray/mist has been inhaled, proceed as follows:- move affected person to fresh air and keep warm and put in a rest position comfortable for breathing. Get medical assistance if any discomfort continues.

4.2. Most important symptoms and effects, both acute and delayed

Skin contact: There may be mild irritation at the site of contact.

Eye contact: There may be irritation and redness.

Ingestion: There may be irritation of the throat.

Inhalation: No symptoms.

4.3. Indication of any immediate medical attention and special treatment needed

May cause lung damage if swallowed. If swallowed immediately seek medical

Immediate / special treatment: assistance. IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR EMERGENCY MEDICAL CARE.

Section 5: Fire-fighting measures

5.1. Extinguishing media

Extinguishing media: Alcohol resistant foam. Water spray. Carbon dioxide. Dry chemical powder. Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Exposure hazards: Flammable. In combustion emits toxic fumes. Forms explosive air-vapour mixture.

5.3. Advice for fire-fighters

Advice for fire-fighters: In case of a large fire or in confined or poorly ventilated spaces, wear full resistant protective clothing and self contained breathing apparatus (SCBA) with a full face-piece

operated in positive pressure mode. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Do not use water jet as an extinguisher, since this will spread the fire. Prevent run-off from entering drains and water courses. Do not allow to enter drains, sewers or watercourses.

Section 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: Refer to section 8 of SDS for personal protection details. Notify the police and fire brigade immediately. Eliminate all sources of ignition. Turn leaking containers leak-side up to prevent the escape of liquid.

6.2. Environmental precautions

Environmental precautions: Do not discharge into drains or rivers. Contain the spillage using bunding.

6.3. Methods and material for containment and cleaning up

Clean-up procedures: Absorb into dry earth or sand. Transfer to a closable, labelled salvage container for disposal by an appropriate method. Do not use equipment in clean-up procedure which may produce sparks.

6.4. Reference to other sections

Reference to other sections: Refer to section 8 of SDS.

Section 7: Handling and storage

7.1. Precautions for safe handling

Handling requirements: Smoking is forbidden. Use non-sparking tools. Ensure there is sufficient ventilation of the area. Avoid the formation or spread of mists in the air.

7.2. Conditions for safe storage, including any incompatibilities

Storage conditions: Store in a cool, well ventilated area. Keep container tightly closed. Keep away from sources of ignition. Prevent the build up of electrostatic charge in the immediate area. Ensure lighting and electrical equipment are not a source of ignition.

Suitable packaging: If original drums, barrels can not be used then mild steel /stainless steel drums/barrels may be used in an emergency.

Hand protection: Protective gloves. Recommended thickness of the material ≥ 0.7 mm. Nitrile butyl rubber (NBR). Impermeable gloves, change regularly to avoid permeation problems.

Eye protection: Safety goggles. Ensure eye bath is to hand.

Skin protection: The type of protective equipment must be selected according to the concentration and amount of dangerous substance at the specific workplace. Long sleeved protective clothing. Nitrile, neoprene or PVC apron. Chemical overalls. Wear appropriate clothing to prevent any possibility of liquid contact and repeated prolonged vapour contact. Wear approved chemical safety goggles where eye exposure is reasonably probable.
